Claims 1-3 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. Elements critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). Line 2 of each of claims 1-3 recites "obtained by dissolving (22-33 wt%) into". The claims fail to set forth the component which comprising 22-33wt%. Page 4 of the specification clearly sets forth the missing material as "celluloid". The term "celluloid" is a registered trademark and should be clearly identified as such in the instant application. Furthermore, the use of trademark in a claim renders the scope of the claim indefinite in that a trademark, strictly, identifies the source rather than the composition of a product. The art recognized generic synonym "pyroxylin" should be substituted in the claims and identified in the specification.

The use of the trademark CELLULOID has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

Claims 1-3 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, set forth in this Office action. The prior art of record fails to teach or suggest the improved properties (imitation pearl) obtained with the specific proportions of pyroxylin, acetone (claims 1-2 only), ethylacetate, butylacetate and, amylacetate (claims 1-2 only).
